

ENDLESS GLASS DOOR MERCHANDISERS

Use as stand-alone models or create a line-up
with as many doors as needed

STANDARD FEATURES

- Refrigerator and freezer models available with either semi-self-contained or remote refrigeration systems
- Individual models may be used as stand-alone merchandisers or combined in a line-up
- Largest glass door height and tallest interior case height showcases more products
- 23" deep cantilever shelves are deepest standard shelves available
- Five shelves per door provide an exclusive larger cu. ft. pack-out area
- Modular design allows you to create a line-up with as many doors as required
- Front air curtain prevents warm, moist air from entering cabinet during door openings

Remote Refrigeration Models (BEM Model Refrigerators, BEL Model Freezers)

BEM-2-30/BEL-2-30

BEM-3-30/BEL-3-30

BEM-4-30/BEL-4-30

BEM-5-30/BEL-5-30

Semi-Self-Contained Models (BEM-SC Model Refrigerators, BEL-SC Model Freezers)

BEM-2-30SC/BEL-2-30SC

BEM-3-30SC/BEL-3-30SC

BEM-4-30SC/BEL-4-30SC

BEM-5-30SC/BEL-5-30SC

* Includes removable skid runner for installation purposes. Without runner: 79-3/4"H. On semi-self-contained models, add 20" for overhead shroud.
 ** Add 2-1/2" (64 mm) to length for each end or insulated partition. Also allow an additional 1" clearance for case and assembly dimensional tolerance stack-up.
 *** Depth includes end panels, door handles and required rear piping stand-offs.

Choice of Remote or Semi-Self-Contained Refrigeration Systems

Remote refrigeration systems with roof-mounted condensing units reduce sales floor heat and noise, ideal where roof access isn't a concern.

Remote systems include a condensing unit with all necessary components supplied for installation. Temperature and defrost settings are adjusted through the standard electronic controller located on the merchandiser. Evaporator coils are mounted in the bottom of the merchandiser and feature heavy-duty copper tubing as well as a pre-mounted expansion valve for installation efficiency.

Semi-self-contained refrigeration systems are ideal in areas where space is limited and roof access isn't practical. While installation requires electrical and system set-up, these systems are designed to be operational faster than remote systems.

A 20" tall steel shroud provided by Master-Bilt covers all components.

The condensing unit is covered with a sound dampening fiberglass mat.

Endless CP: A Quick Solution For Single Case Needs

Endless merchandisers are very customizable and you can configure them to fit nearly any retail requirement. However, some situations call for just a single cooler or freezer case. That's where the Endless Complete Package (CP) models come in.

Designed for easy, no-fuss ordering, each Endless CP model ships complete with all components needed for quick installation.

- Self-contained refrigeration system*
- Black interior and exterior
- Mounted left and right-hand ends
- Top shroud for covering refrigeration system*
- Bumper assembly*

*Condensing unit, shroud and bumper assembly shipped loose.

STANDARD FEATURES

Maximum Merchandising Area

In Master-Bilt Endless models **100% of product pack-out space falls within the visible merchandising area.** That means **all** your products are being seen. With a combination of largest glass door height and tallest interior case, Endless models provide over 200 square inches more viewing area per door than glass door sizes in similar models.

Air Curtains Keep Products Cool

Endless models have optimized front air curtains preventing warm air from entering the case during door openings. Keeping warm air out means the refrigeration system doesn't work as hard to keep products cold. Consistent cold temperatures inside the merchandiser also reduce product loss.

Effective & Efficient LED Lighting

Endless merchandisers are equipped with high quality LED lighting to showcase your products in the most natural, complementary lighting. Additionally, lighting is evenly distributed throughout the case to eliminate dark areas and make products stand out. LED lighting is also much more energy efficient and saves on operational costs.

Electronic Controller System

Endless merchandisers are equipped with an electronic controller system to ensure reliable performance and protect your products.
