THE FINISHING TOUCH

FOODSERVICE COLLECTION

THE FINISHING TOUCH

Any drink, whether it's a cocktail, wine or beer, is best enjoyed in a glass that enhances its taste, smell and appearance. At ONIS, we truly believe the right glass adds value, as it's the first impression of the drink to your guest. We want the right glass to enrich the flavor and aroma of your drink to make it even more enjoyable. But we also want it to stand out.

Choosing the right glass makes all the difference and is the final step to make the drinking experience perfect. The final effort that elevates this experience from good to great.

All details count when creating that ultimate drinking experience, where the glass is the finishing touch!

KATE GERWIN GLASSOLOGY WINNER

Kate Gerwin, winner of Glassology by ONIS third edition, is a celebrated bartender, hospitality consultant and owner of Happy Accidents bar in Albuquerque, United States of America. Kate made history as the first female to win the Bols Bartending World Championship and the Glassology by ONIS. With over 20 years of experience, she has been globally recognized as one of the industry's Top 100 Most Influential Figures in the World.

From the moment Kate Gerwin was announced as the winner of the Glassology by ONIS third edition, with her design The Glitch, we knew it would be the beginning of an exciting adventure.

As Kate states, "Winning this competition is not only an honor but a dream. As bartenders, we always look for ways to make our drinks shine, and glassware is so important to our creative process. Having the opportunity to create my own design and see it produced for the world is indescribable. I'm overwhelmed with gratitude for the chance to compete with such incredible bartenders who are so talented. What an experience!"

Kate made a memorable visit to our Portuguese plant, where she witnessed her winning design, The Glitch, coming to life in loco! Besides the production of The Glitch, Kate left an indelible mark at our Portuguese plant; she personally created a graffiti of The Glitch, which became a point of interest for all visitors!

Kate's extremely positive feedback reinforced her commitment to promoting The Glitch worldwide, making it one of the most desired products in the market.

WHERE ARE WE MADE AND BY WHOM

Leerdam Crisal Glass (LC-Glass) has been writing the history of Glass in Europe since the XVIII century. We are proud of our rich roots in the European glass cities of Leerdam, The Netherlands, and Marinha Grande, Portugal. In our open organization in which Northern and Southern Europe come together, we embrace diversity, stimulate and challenge each other to continue to innovate and improve ourselves every day. We take care of each other and the world around us, and are constantly working to make the production process more sustainable, for example by using energy-efficient furnaces and green energy wherever possible.

We have been designing, producing, and selling glassware for 250 years under the brand Royal Leerdam for the consumer and now introducing ONIS, the new iconic brand for professionals. Our glassware can be found everywhere; in many restaurants and bars but also in the cosiest homes worldwide. We dedicate our day-to-day business to those looking for quality and originality.

WHAT WE ARE PROUD OF:

100% Recyclable Products: Our products are completely recyclable without compromising quality.

Food-safe Glassware: Our glassware is 100% food-safe and environmentally friendly.

Cullet Reuse: Each new glass starts with 20% to 50% of our own pre-consumer recycled glass (cullet), reducing our environmental footprint.

Decarbonization Research: We're actively researching decarbonization methods like electrification and the use of hydrogen.

Eco-Conscious Manufacturing: For years, we have been leading in eco-friendly manufacturing, by implementing the most sustainable furnaces in the industry in both production units.

Cutting waste and preserving resources: From our product packaging to catalogues and leaflets, we are now transitioning to using stands and displays made of compressed cardboard, which can be fully recycled after use.

Innovative Repurpose cycling: By repurposing existing molds, we give discontinued products a new life cycle and adapt them to current market trends.

Environmental Collaboration: We collaborate closely with national environmental and waste entities to promote recycling and upcycling.

Paperless Operations: Minimizing paper usage through digitalization of all our processes.

Diversity and Social Justice: We celebrate diversity, support racial equality, and advocate for social justice.

Community Support: We support various organizations through monetary donations and in-kind product contributions.

Sharing is caring: We welcome local communities to visit our plants and learn about the amazing glass production process; we share the best we make.

RECYCLING HAS ALWAYS BEEN AT THE HEART OF OUR BUSINESS!

We aim to produce 100% recyclable glass products with zero impact on the environment, assuring that the next generations can live in a better world. We do this by applying sustainable processes throughout the organization and supporting social, economic, and cultural progress in the communities where we live and work.

WHAT SETS APART

The product has an elegant thin yet robust stem. Proof that elegance can go hand in hand with sturdiness.

Glassware designed to bring out maximum aroma and flavor for increased quality perception in serves.

The product has a very fine polished rim for an elegant look & feel and refined drinking experience.

The product is designed to be stacked for space saving purposes.

This special thermal after-process strengthens the upper portion of the glass, the area most vulnerable to breakage. It increases the resistance to thermal and mechanical shock which results in remarkably durable glassware with prolonged service life.

The colour is embedded in the mass of the glass during its production, and not applied by an after-process, and therefore fully resistant to dishwashing and scratching.

This product showcases a larger footplate for extra stability, granting an additional elegance to the piece. It is the perfect balance between form and functionality.

In the ONIS collection, we can find the most iconic glasses, with a timeless and striking design that many know only by the silhouette, such as Icon, Flashback and SPKSY.

The Glassology Contest challenges professionals working in the Drinks Industry, to develop and create their ultimate glassware design. As a result of that, some of our product ranges find their roots in this competition, including: The Gats, 1924, the Tulip Punch Bowl and Divergence.

XTRATUFF

ONIS' Xtratuff treatment is a super strengthening thermal after-process for "pressed" tumblers.

The Xtratuff process is only performed on the upper third of the glass, which increases its resistance to thermal and mechanical shock.

By treating this upper portion at a lower temperature than tempering, you put less stress on the glass. This has a positive effect on how the glass breaks and also improves its overall durability.

EMBOSSMENT

ONIS EUROPE

Proudly produced in Europe, our tumblers will hold the distinctive ONIS EUROPE at their bottom. This stamp symbolizes our dedication to design excellence and European quality.

ONIS XTRATUFF

Our XTRATUFF glasses will feature, the XTRATUFF signature at their bottom. This distinctive detail ensures you can always identify the exceptional super-strengthening thermal after-process applied to the upper part of the “pressed” tumblers.

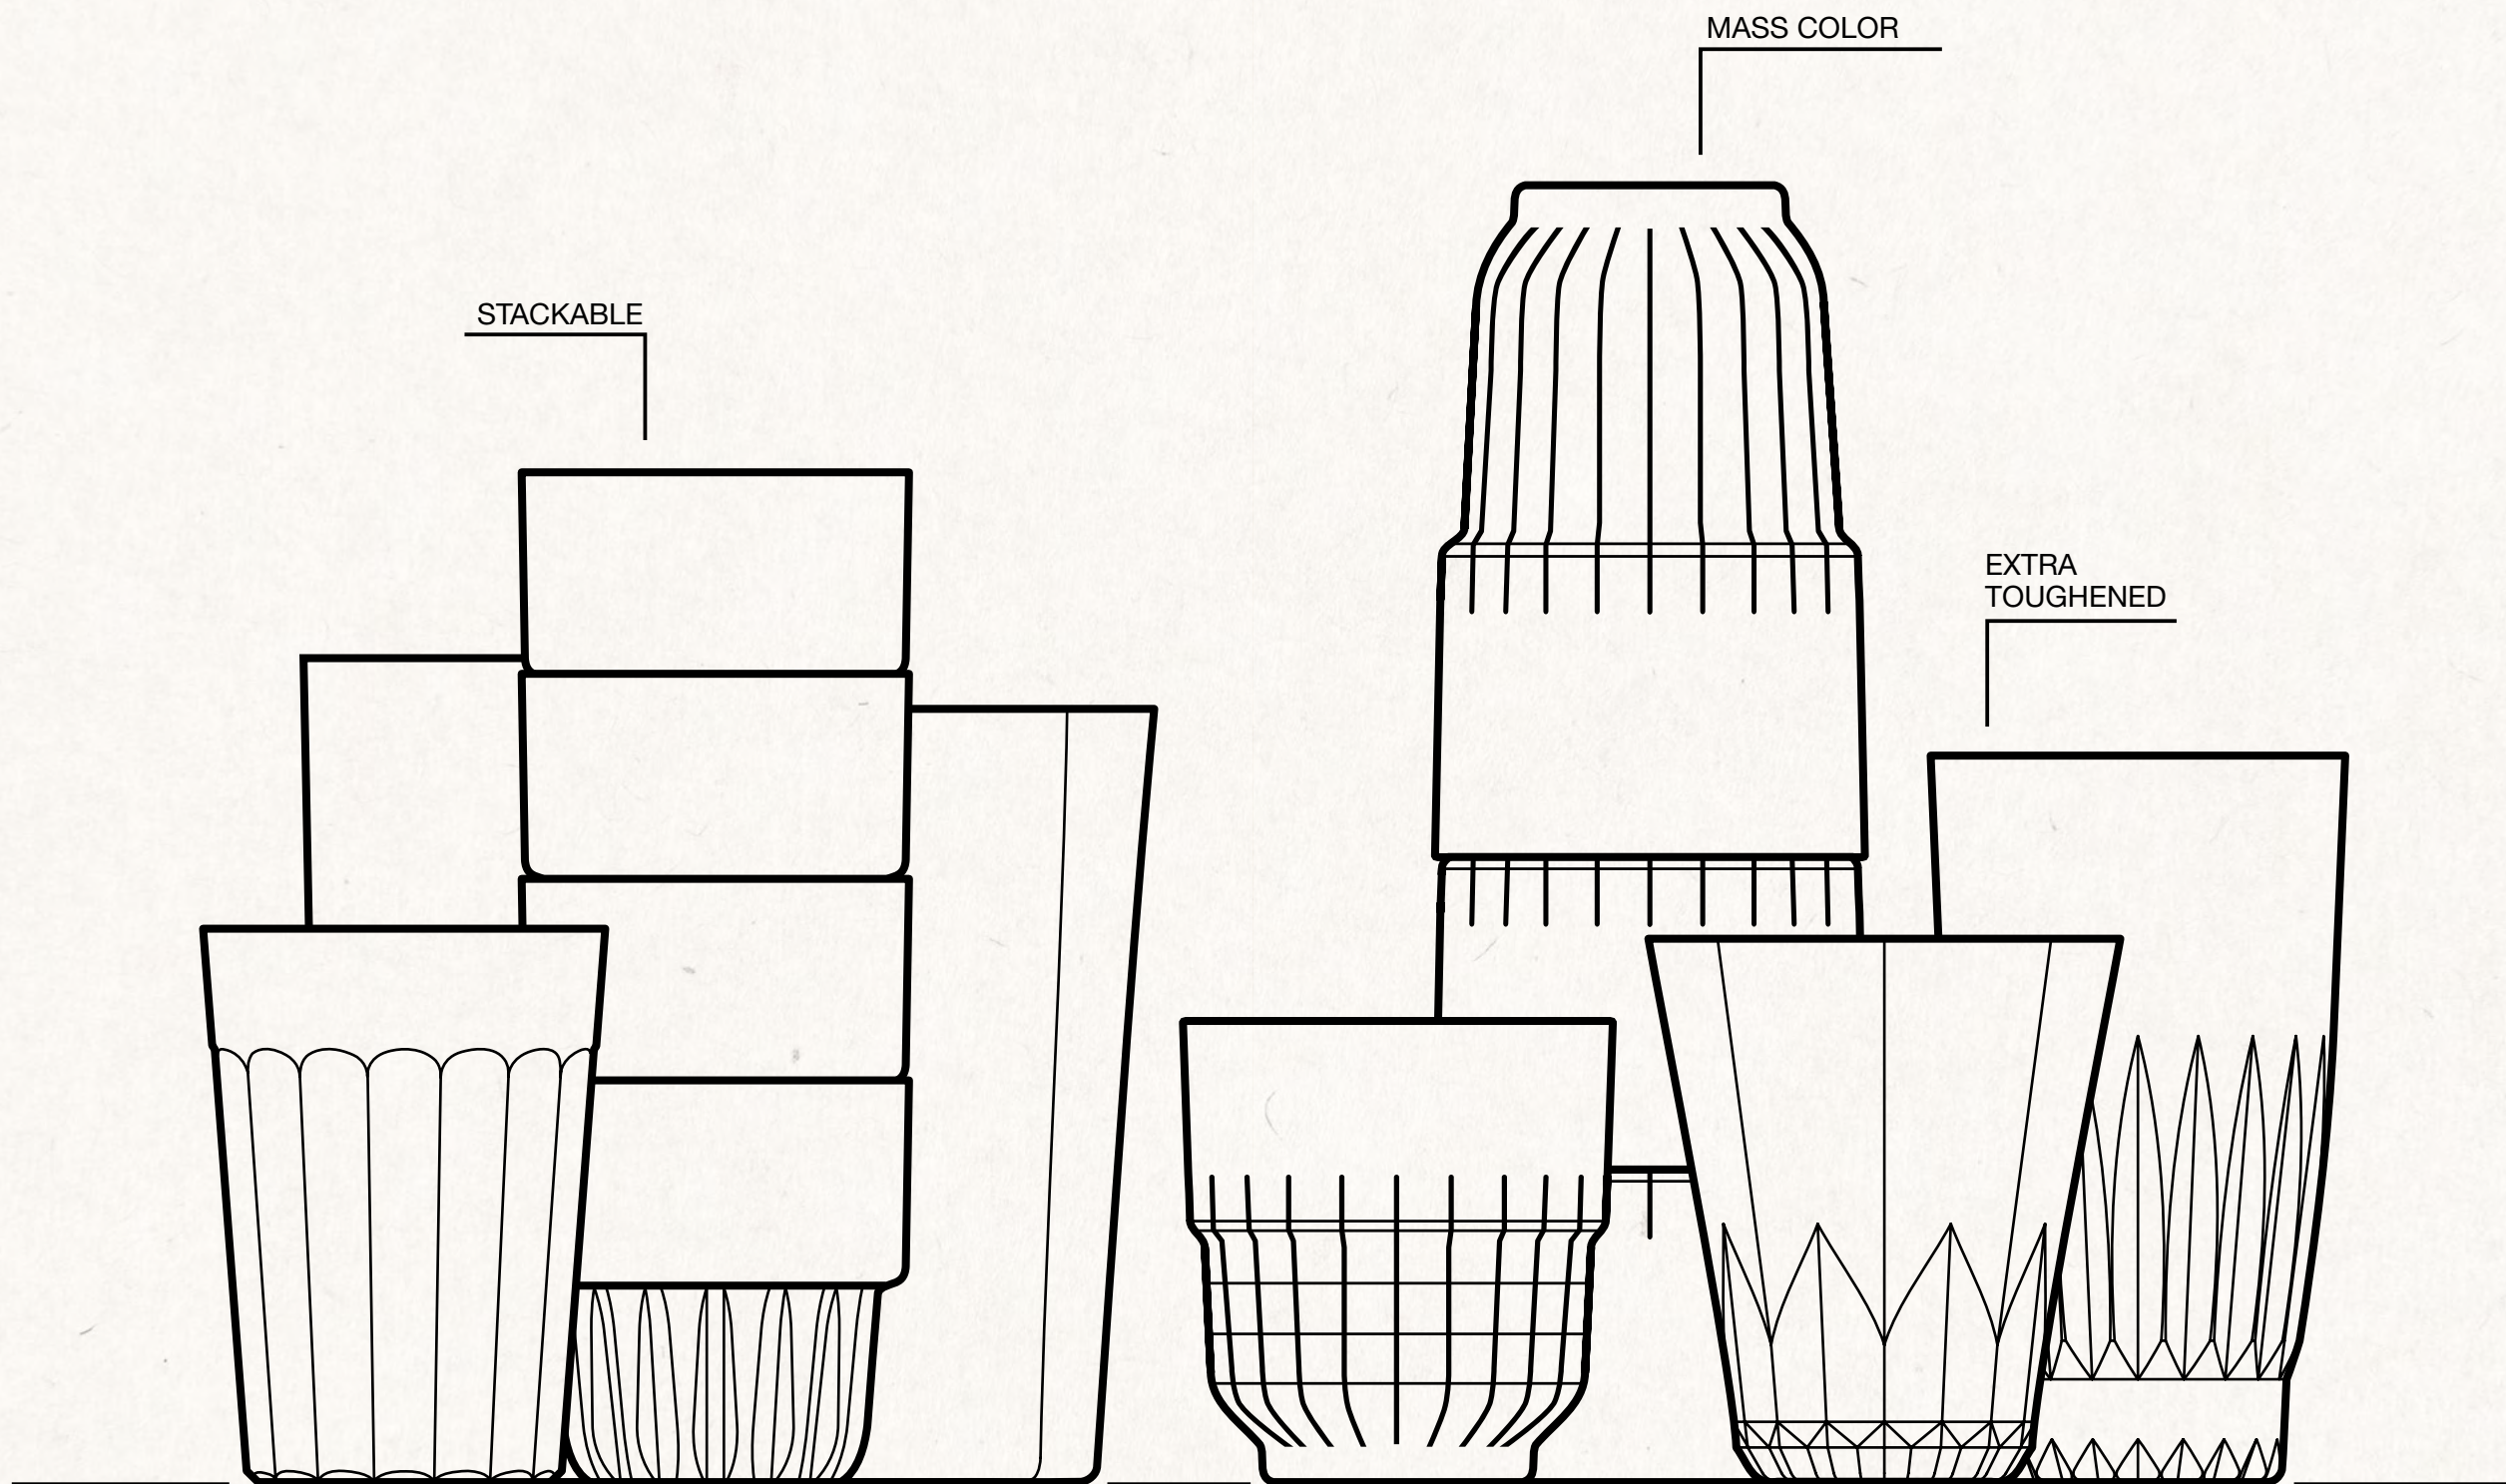

EMBOSSMENT

ONIS FOOTPLATE EMBOSSMENT

Discover the signature touch of ONIS logo added to selected stemware, making it distinctly ours. This unique detail reflects our firm commitment to quality and style.

COCKTAILS

BY ONIS

THE GLITCH

NEW

Collins

0-1005965 - 6/case
40 cl - 13.5 oz ≈
h 5.9" - Ø 2.9" ≈

This unique glass, with its artful design, impacts all five senses and enhances the drinking experience!

Its mismatched steps, where the drink spreads, make it appealing to the eye and make you want to fit your fingers on those little glitches on the sides.

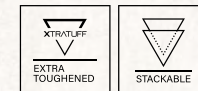

From glass to garnish, the cocktail must be a work of art! So, when creating The Glitch, Kate wanted to create a glass that gets that 'wow factor', but stays classy and inspiring.

You cannot resist it!

Born from the mastery of Glassology by ONIS, The Gats Stemware showcases geometric lines and luxurious ornaments to the stem.

These glasses, designed together with The Gats Creator Yochen Verbeeck, are more than just a range extension, The Gats Stemware are statement pieces that add value and differ the ONIS glassware collection.

WARM BEVERAGES & DESSERTS

The Glassology Contest challenges professionals from the Drinks Industry to develop an original glassware design that offers the ultimate drinking experience for high-level guests. They are given the opportunity to come-up with a glass shape that elevates a reinvented cocktail or their newest boozy creation.

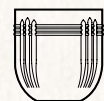

The winner earns global recognition, as his design is taken into production to be sold by ONIS, all over the world. The cooperation with continues after the contest, as the winner is named Glassology ambassador in bar shows and cocktail events and will be part of the jury of the next edition.

GLASS HANDLING GUIDE

WHY GLASSWARE BREAKS

Glassware is one of the most important tools used in the hospitality industry. It is also one of the hardest materials around, yet under certain conditions it can also be fragile. The number one reason for glass breakage is improper handling. This guide presents you and your staff with insights into how to minimize breakage through proper handling of your glassware. By applying these tips you can save 20-30% on glassware costs.

THERMAL SHOCK

Glass holds temperature, and a rapid change in temperature can cause enough stress to result in breakage. The main moments when thermal shock loss can occur are in the dishwashing cycle and when preparing drinks. To minimize loss always allow glasses to reach room temperature before and after they are washed and pre heat glasses that will hold warm beverages.

MECHANICAL SHOCK

Mechanical shock in glassware is the direct result of contact with another object, such as a spoon, a beer tap, another glass, or a piece of china. This kind of contact can cause a minute abrasion, invisible to the eye, but a source of weakness in the glass, making it more susceptible to breakage from impact or thermal shock.

Spanish

French

Portuguese

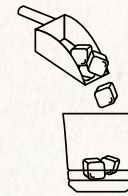

Italian

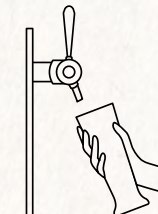

Bulgary

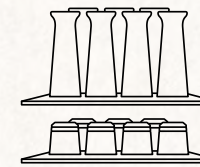

DRINK PREPARATION

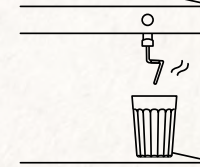

Use plastic scoops to pour ice.

Never let a glass touch the tap or dispenser.

Re-stock glassware to be prepared for rush periods.

Pre-heat glasses that will hold warm beverages.

SERVICE

Never carry glasses in bouquets.

Bottles should not touch glasses when pouring.

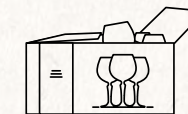

Remove glasses that are no longer in use from the table.

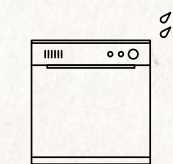

Glasses should not touch each other on trays.

WASHING AND CLEANING

Wash before first use.

Check the temperature of the dishwasher rinsing and drying cycles.

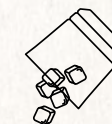

Remove damaged or abraded glassware from service (damaged glass may break in the dishwasher).

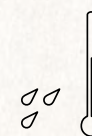

Use the correct rack for the glasses you are washing.

Hold stemware by the stem (not foot) when polishing.

Remove ice from glasses as quickly as possible (to avoid thermal shock).

Check the temperature of the water regularly.

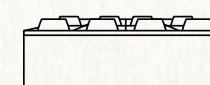

Sort items in bus bins or trays (do not overload them).

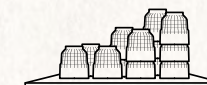

Never put cutlery or other objects inside glasses.

STORAGE

Store glasses in correct compartmentalized racks or boxes.

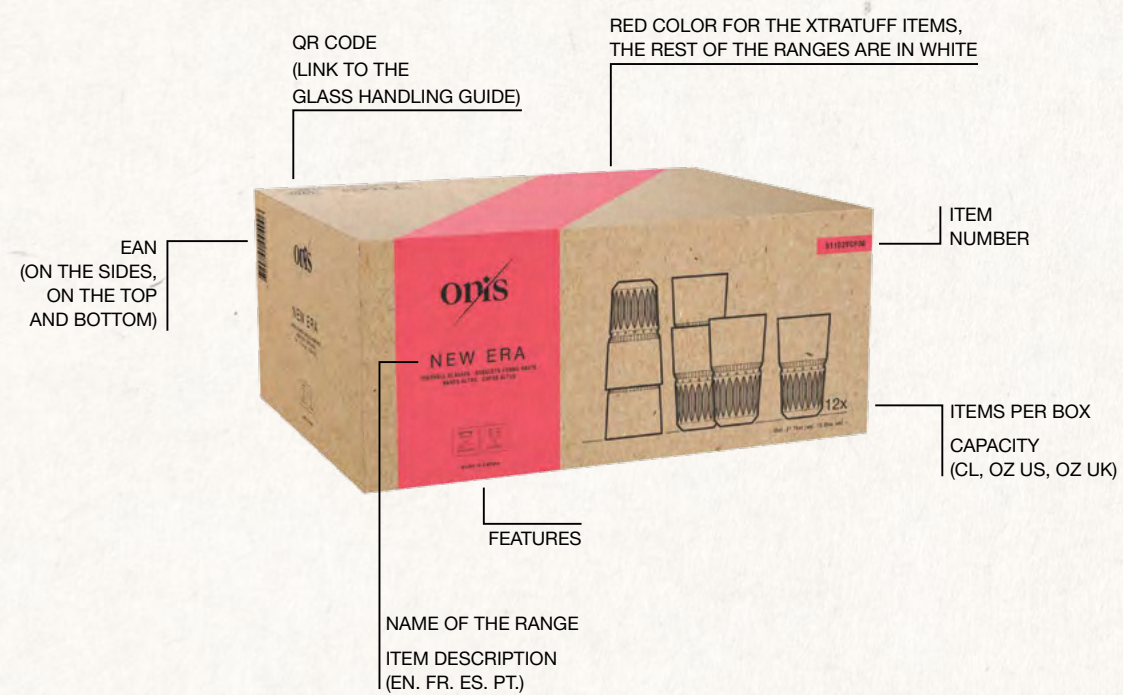

Only stack glasses which are designed for this.

Glasses in overhead racks should not touch.

Allow glasses time to cool before handling them.

ABOUT OUR PACKAGING

We have implemented eco-friendly packaging solutions, such as recycled cardboard materials and used a reduced number of inks. Designed to be easily recycled after use, reducing waste and conserving resources.
